

Akarsh Jain

jainakarsh2805@gmail.com — +91 9399800172 — [LinkedIn](#) — [GitHub](#)

Summary

Full-stack developer with backend expertise in FastAPI and REST APIs, experienced in building scalable AI-driven applications. Strong understanding of SDLC, cloud technologies, and Java fundamentals, with a focus on developing efficient, enterprise-level solutions.

Experience

Software Development Intern, Femira (by Meraji), Indore

Jan 2026 – Feb 2026

- Developed and optimized 10+ frontend and backend features, improving application performance and reducing UI latency by approximately 25%.
- Collaborated in Agile SDLC cycles including requirement analysis, debugging, testing, and deployment workflows.
- Designed and integrated REST APIs for handling dynamic user requests and backend data flow.
- Automated repetitive workflows, reducing manual effort by nearly 30% and improving system efficiency.
- Used Git and GitHub for version control, collaboration, and maintaining production-ready codebases.

Projects

Project Synapse – AI-Powered Last-Mile Delivery Platform [\[GitHub\]](#) [\[Live\]](#)

Aug 2025 – Oct 2025

React.js, Next.js, Tailwind CSS, REST APIs, SQLModel, Leaflet.js

- Developed a full-stack delivery system supporting 500+ simulated users with real-time tracking.
- Built backend services using FastAPI for handling real-time order processing and API communication.
- Optimized API response time by approximately 20% through efficient data handling and architecture.
- Designed role-based dashboards for customers and riders with scalable component architecture.

Sahayak AI – Intelligent Assistance System [\[GitHub\]](#)

Dec 2024 – Jan 2025

Java, Python, NLP, AI Models, REST APIs

- Developed an AI-powered assistant using NLP workflows for intent detection and contextual responses.
- Implemented backend logic for handling user queries and generating relevant responses.
- Improved response accuracy and interaction flow through optimized conversational design.

MEDIBOT—AI-Enabled Teleconsultation System [\[GitHub\]](#)

Jul 2024 – Aug 2024

React.js, Next.js, Tailwind CSS, AI/NLP concepts, REST APIs

- Built a responsive teleconsultation platform to improve healthcare accessibility.
- Implemented symptom-based workflows using modular UI and backend API integration.
- Enhanced user interaction flow and accessibility through optimized interface design.

Technical Skills

Programming: Java (OOP, DSA), Python, JavaScript

Backend: FastAPI, REST APIs, API Integration

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Databases: MySQL, PostgreSQL

Cloud: AWS (EC2, S3, IAM), Google Cloud

Concepts: SDLC, Agile, System Design

Tools: Git, GitHub

Achievements

- Secured Top 20 position in GrabHack among national-level teams (Top 5% participants).
- AWS Certified Cloud Practitioner.
- IBM Generative AI Certification.
- Oracle OCI Generative AI Professional Certification.
- Generative AI internship at SmartBridge and SmartHub Internship: gained experience in AI workflows, prompt engineering, and enterprise AI use cases.

Extracurricular

- Vice President, Edu4U Club – Led and managed a team of 50+ members, organizing academic and technical events.
- Student Coordinator – TCS Recruitment Process, gaining exposure to hiring workflows and candidate evaluation.
- Participated in national-level hackathons including SIH, EY, Amazon, Myntra, Adobe, and TVS challenges.

Education

Vellore Institute of Technology, Bhopal

Sept 2022 – Oct 2026

B.Tech in Computer Science and Engineering

CGPA: 7.92
